Quality Performance Affordability Investment Innovation Market Leaders

Earlex has a heritage to be proud of, after establishing itself from modest beginnings in 1987 by inventing the world's first DIY wallpaper stripper. Earlex now exports its market leading products to over 50 countries worldwide with offices in the UK, USA, Europe and China.

Still going from strength to strength, Earlex products continue to diversify and expand, offering the latest expert technology in power decorating. The product range offers everything from wallpaper strippers, steam cleaning solutions to the SprayStation® painting range that has won several industry awards.

“ For over 25 years UK manufacture has been the forefront of our success. We are incredibly proud of where we are today, our dedication to outstanding design and patented ideas means we are one of the most innovative power decorating manufacturers worldwide.

Customer satisfaction is primary to everything; it is essential our products deliver outstanding performance and quality to continue our solid reputation far into the future.

How does a SprayStation® work?

The Earlex SprayStation® uses the latest innovation in paint spraying with HVLP technology. HVLP stands for 'High Volume, Low Pressure', it allows quick and easy paint spraying that gives you a great finish every time. It is similar to a conventional spray gun using a compressor to supply the air, the spray gun itself requires a lower pressure (LP).

A high volume (HV) of air is then used to atomise and propel the paint at this lower air pressure. The result is a higher proportion of paint reaching the target surface with reduced overspray and material consumption.

What are the benefits?

Quality Professional results every time with maximum control and minimal overspray

Cost Saving Less wastage and consumption of paint means materials go much further than a brush or roller

Fast Faster than traditional painting methods such as a brush or roller

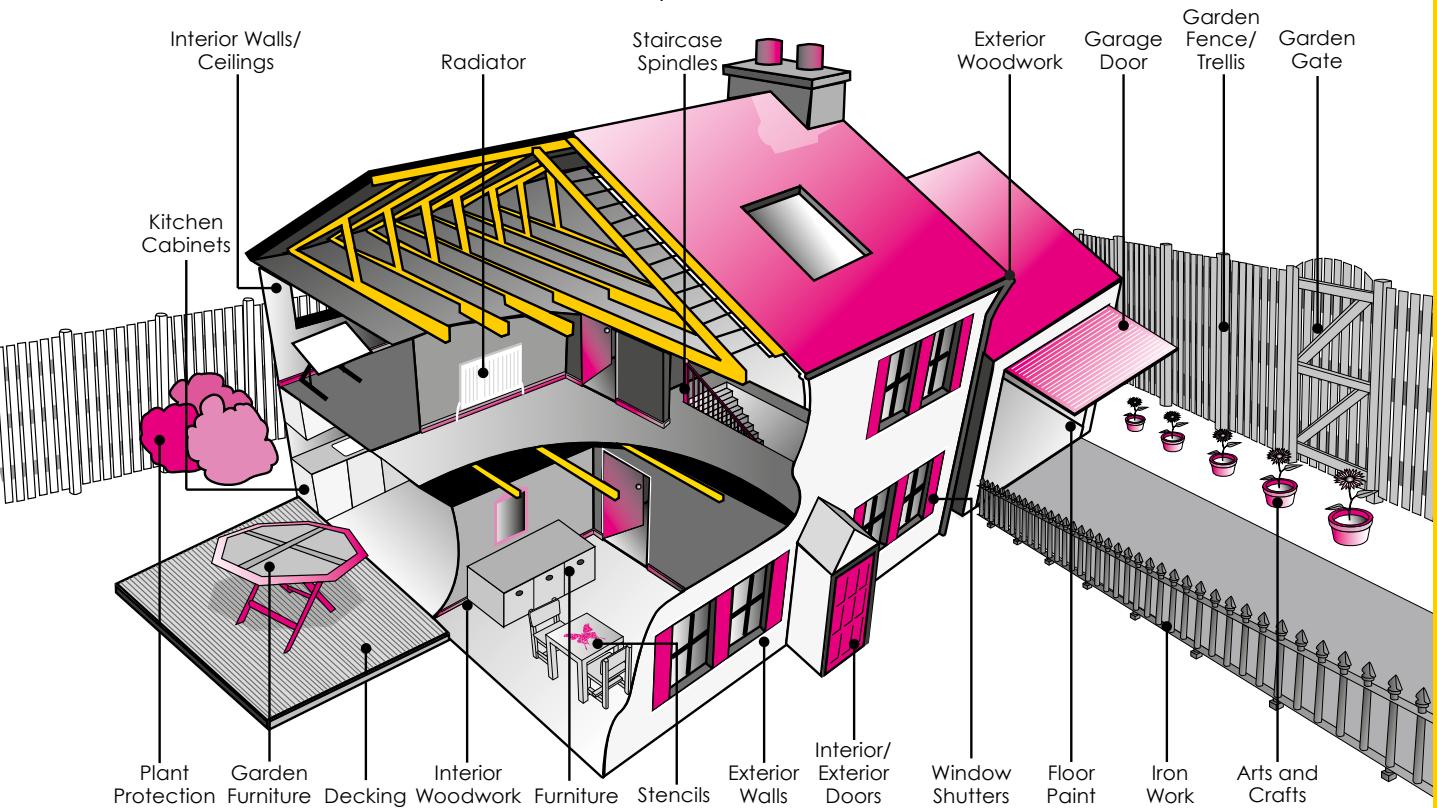

Versatile Use for any painting task; large, small or intricate, both indoors and outdoors, using a wide variety of paints, stains and lacquers

Easy Minimal skill required; this system is easy to use and faster to clean than a brush or a roller

Efficient All in one system, quick to set-up, providing a hassle-free modern way to paint

What and where can I spray?

The Earlex SprayStation® is incredibly versatile and can provide a helping hand for all of your painting needs in and around the home and workshop.

What materials can I spray?

The Earlex SprayStation® range can spray a wide selection of paints and liquids including:

- Gloss
- Primer
- Emulsion
- Wood treatment
- Fence treatment
- Lacquers
- Smooth masonry paint
- Water sealants
- Varnishes
- Latex Coatings

SprayStation®

Fast professional finish, easy, precise & efficient

DIY SprayStation®

HV1900

Perfect entry level system for the first time user

Spray pattern	3 settings
Motor	400W
Paint capacity	0.9 litre
Hose	2.7 metre
Needle size	2.0mm

Job size - SMALL

With an Earlex DIY SprayStation® there are no brush marks, no drips, just a smooth professional finish.

This SprayStation® is able to spray most water and solvent based paints such as emulsions, primers, varnishes, lacquers, gloss, stains and fence treatments.

Expert SprayStation®

HV3900

Simple painting for larger projects around the home and garden

Spray pattern	3 settings
Motor	550W
Paint capacity	1 litre
Spray Pack	5 litre
Hose	4 metre
Needle size	2.0mm

Job size - MEDIUM/LARGE

The Ultimate SprayStation® is a multi-purpose sprayer with a 4 metre hose and both a 1 litre paint pot for small intricate work and a 5 litre spray pack designed for larger projects. The round lid on the front of the spray pack is quick to re-fill, taking the stress out of big jobs.

Suitable to spray most water and solvent based paints such as emulsions, primers, varnishes, lacquers, gloss, stains and fence treatments.

Superb for radiators, skirting boards, staircase spindles, louvered doors, kitchen cabinets, ceiling coving and roses.

Ultimate SprayStation®

HV3901

This versatile solution is capable of taking on many painting tasks and provides fast professional results

Spray pattern	3 settings
Motor	550W
Paint capacity	1 litre
Spray Pack	5 litre
Hose	4 metre
Needle size	1.5mm/2.5mm

Job size - MEDIUM/LARGE

The Ultimate SprayStation® offers identical performance to the HV3900 but with a different shape of turbine.

With a 5 litre spray pack and 4 metre hose it provides ease of movement for all projects in and around the home. The spray pack is ideal for larger tasks like fences, decking and walls enabling you to paint continuously without frequently refilling the paint container.

The Ultimate SprayStation® is supplied with a 2.5mm and a spare 1.5mm needle for spraying most water and solvent based paints such as emulsions, primers, varnishes, lacquers, gloss, stains and fence treatments.

SprayStation®

HV5500

Semi-professional unit for light contractor jobs, woodworkers and serious DIY enthusiasts

Aluminium Gun	Non-stick coated container
Motor	650W
Paint capacity	0.9 litre
Hose	4 metre
Needle size	2.0mm

Job size - LARGE

Designed for power and precision this paint sprayer is lightweight and compact in size, ideal for the workshop, home and job site use.

Perfect for medium to large sized projects, interior and exterior trim, doors, walls, fences and shutters. This system comes with a professional non-stick PTFE coated metal container and the gun includes a 2mm stainless steel needle.

Impeccably tough and is designed to spray a wide variety of paints and liquids.
